Summary of Issue:

Today we had plans to take our clients down off the mountain to go see a movie and take them out to lunch. On our way down the mountain we encountered a complicated issue where one of the boys started to feel sick. One of the other staff mentioned to me while I was driving down canyon road (UT-143) that [REDACTED] was throwing up all over the back seat of our van. I quickly pulled over and helped Justin get him out of the side doors to continue to throw up. We both noticed he started to look a little loopy which didn't seem normal. He quickly went from bad to worse when he started to go in and out of consciousness and also showed symptoms of slurred speech. We quickly realized that this situation was going to get worse until we got him to the proper medical care. On the way to the Cedar City emergency room his symptoms got a little worse so we pulled over to call 911 emergency. After we called we were instructed by dispatch to get him out of the van and lay him on the ground, we promptly did so. 5 minutes after we called dispatch the Parowan UT police showed up on scene to help with the situation. 10 minutes after we called dispatch the Ambulance showed up to take over the situation. He was taken to the Cedar City hospital where he was cared for until the symptoms passed.

It was determined at the hospital that [REDACTED] had ingested Rubbing alcohol. [REDACTED] was treated and released from the hospital the same day.

Clients Involved:

[REDACTED]

Licensees, Staff, and Witnesses Involved:

Jordan Call

Licensee Follow-Up

Actions Taken by Licensee:

Parents were contacted as well as Monuments management team and nursing staff. [REDACTED] was placed on a suicide awareness which requires him to be always within arms length of staff and have restricted activity and with peer interactions.

Actions Planned by Licensee:

Program team will review safety protocol around security of alcohol and other chemical products. Team will also perform an autopsy of the incident and address areas that need attention and support the areas the team handle the incident well. All staff will be trained on the new protocol as well as ongoing awareness training of day to day operation.

Additional Comments:
